| Class          | Price     |
|----------------|-----------|
| Economy        | Inelastic |
| First class    | Elastic   |
| Business class | Elastic   |

The price differs because there are different facilities available in different classes. In business class they are more facilities because they are standard classes. But in economy they are less in price for several reasons. They provide less facilities in comparison to other classes. It is less flexible than others. The price differs due to different factors such as food, electricity etc. So the economic class is inelastic as it take less part of their income comparison to other two classes/.
