

## Experiment No.6

### Herbicide and agrochemicals Study

#### 6.1 Objectives

To study about the identification and common agrochemicals available in the market.

#### 6.2 Materials required

- i. Herbicides container bearing labels
- ii. Sample labels of various types of commercial herbicides

#### 6.3 Procedure

Read the information on the labels attached to the herbicide containers. Record the information in a systematic manner.

#### 6.4 Observation

Record the following observations in tabular form indicating common name, trade name, formulation and manufacturing company of agrochemicals.

**Table 6.1 Identification of herbicides, insecticides, fungicides, bactericides and acaricides**

List of commonly available agrochemicals and their manufacturing companies
