

Camphor Liniment

Aim: To prepare and dispense 10ml of camphor liniment.

Requirements: camphor, arachis oil, glass rod and beaker.

Principle: camphor in the preparation acts as a counter irritant which reduces pain from sciatica, fibrosites, neurogiaect. by producing warm tingling & numeness. When rubbed into the skin, if they also cause redness, they are called rubefaciants. Blunt oils such as arachis oil are less irritant and spread easily into the skin which aids penetration of medicament into the skin and potentiates these counter irritant and rubefaciant action.

Procedure:

Camphor was accurately weighed dissolved in arachis oil & then transferred into a clean container labeled & dispensed.

Label:

Category: counter irritant, antipyretic.

Storage: stored in a well closed container.

Special instruction: To be applied on effected part with friction.

Caution: Shake well before use should not be applied to broken skin.

Report:

S.no	Ingredients	Official quantity	Required quantity
1.	Camphor	200gm	
2.	Arachis oil	1000ml
