Empowering Communities...*

What to do & what not to do

- We should follow the rules as per DGCA.
- We Should charge the batteries properly.
- We Should set the fail safe mode for the safety .
- We should Keep a greater distance from the drone to reduce the accident.
- Always we should keep the batteries disconnected when we are not flying the drone.
- We should not fly the drone during bad weather conditions.
- We should not fly the drone during heavy wind flow.
- We should not fly the drone during high atmospheric temperature.
- We Should not short circuit the terminals of LI-Po batteries.
- Light and temperature should be proper during flight test.
