

# What is the Code of Federal Regulations(CFR)?

- The CODE OF FEDERAL REGULATIONS is the codification of the general and permanent rules and regulations published in the Federal Register by the departments and agencies of the Federal Government of United States.
- Federal Register is the part of the National Archives and Records Administration.
- It is also named as **ADMINISTRATIVE LAW**.

- The regulations first published in the Federal Register on a daily basis are then codified in the Code of Federal Regulations.
- The regulations that are published chronologically in the Federal Register are codified and arranged by title, then by chapter (one agency's regulations) and finally by subject in the CFR.
- The CFR is published in an unofficial format online on the electronic CFR (e-CFR) website, which is updated daily.
- The CFR is divided into 50 titles that represent broad areas subject to federal regulation.

- The CFR is divided into 50 titles, just like the USCA .
- Agencies are assigned chapters within these titles .
- Each title is divided into chapters, parts, and sections and paragraphs .

➤ For example : 21 CFR 210.211

42 CFR 260.11(a)(1)

- “42 CFR 260.11(a)(1)” would be read as :

Title 42 :- Broad subject area of regulations

Part 260 :- Rules on a single program or function

Section 11 :- One provision of program/function rules

Paragraph (a).(1) :- Detailed, specific requirements
